

CALIFORNIA SCHOOL IPM MODEL PROGRAM GUIDEBOOK

TABLE OF CONTENTS

DISCLAIMER	iii
ACKNOWLEDGEMENTS	iii
LETTER TO IPM COORDINATOR AND SCHOOL DISTRICT STAFF	iv
Who Developed This Guidebook?	
What Is the Purpose of the Guidebook?	
Why Use the Guidebook?	
TABLE OF CONTENTS	v
LIST OF BOXES	xi
LIST OF FIGURES	xi
LIST OF TABLES	xi
PART 1: THE IPM PROCESS	1
1: Introduction to California School IPM	
1.1 What Is Integrated Pest Management (IPM)?	3
1.2 Why Implement an IPM Program?	4
1.3 What Is DPR's role in California School IPM?	4
1.3.1 DPR's School IPM Advisory Group	5
1.3.2 DPR's School IPM Web Site	5
1.3.3 School IPM Training	5
1.3.4 Assisting Districts to Establish IPM Policies and Programs	5
1.3.5 School IPM Guidebook	6
1.3.6 Evaluating IPM Adoption in Schools	6
1.3.7 Pesticide Use Reporting Form	6
1.4 What Are the Requirements of the Healthy Schools Act for School Districts?	6
1.4.1 Notification	6
1.4.2 Posting	7
1.4.3 Exemptions to Notification and Posting Requirements	7
1.4.4 Other Requirements for Schools	8
1.5 What Are the Healthy Schools Act Requirements for Licensed Pest Control Businesses?	8

2: Adopting an IPM Program	9
2.1 How to Develop an IPM Program	9
2.1.1 Adopting an IPM Policy	9
2.1.2 Educating Key Decision-Makers	9
2.1.3 Identifying Pest Management Roles and Responsibilities	10
2.2 Developing an IPM Policy Statement for School Pest Management	10
2.3 IPM Operations	12
2.3.1 Developing Site-Specific Pest Management Plans	13
2.3.2 Educating Participants	13
2.3.3 Developing Incentives and Rewards	14
2.3.4 Preparing an IPM Operations Manual.....	14
2.3.5 Building Support for the IPM Program	15
2.4 Community-Based School District Advisory Committee	15
2.5 Community-Based Standard for Notification and Posting.....	16
2.6 Selecting and Training an IPM Coordinator.....	16
2.6.1 Healthy Schools Act Responsibilities of the IPM Coordinator	16
2.6.2 Other Responsibilities of the IPM Coordinator Within an IPM Program	16
2.7 IPM Contract Performance Specifications	18
2.7.1 In-House or Contracted Services?	18
2.7.2 In-House Services.....	19
2.7.3 Contracted Services	19
2.8 The IPM Decision-Making Process	19
2.8.1 IF Treatment Action Is Necessary	19
2.8.2 WHERE Treatment Activity Should Take Place	21
2.8.3 WHEN Action Should Take Place	21
2.8.4 WHICH Mix of Treatment Practices Are the Best to Use	22
2.9 IPM Program Evaluation	24
2.9.1 Questions to Ask After Treatment Action.....	24
2.9.2 Assessing Cost Effectiveness	25
2.9.3 Efficient Procurement	27
3: Monitoring Pest Populations and Damage	29
3.1 What Is Monitoring?	29
3.1.1 Not Enough Time or Money?	29
3.1.2 Levels of Effort Used in Monitoring	30

3.2 Why Monitor?	30
3.3 What to Monitor?	31
3.4 Identifying the Target Pest	31
3.5 Timing Monitoring Activities	32
3.6 Recordkeeping	32
3.7 Evaluating the Actions	33
4: Setting Injury and Action Levels	37
4.1. Determine Injury Levels First	37
4.1.1. Three Types of Injury	37
4.1.2. Injury Levels Differ Depending on the Pest and Its Location	37
4.1.3. Don't Set the Level Too Low	38
4.1.4. Determining the Injury Level	38
4.2. Determine Action Levels Based on Injury Levels	38
4.2.1. Set Conservative Action Levels in the Beginning	39
4.2.2. Avoid "Revenge" Treatments	39
4.3. Declaring an Emergency Under the Healthy Schools Act	39
5: Selecting Least-Hazardous Pest Control Practices	43
5.1 Criteria for Selecting Least-Hazardous Pest Control Practices	43
5.1.1 Least Hazardous to Human Health	43
5.1.2 Least Disruptive of Natural Controls	43
5.1.3 Least Toxic to Non-Target Organisms	44
5.1.4 Most Likely to Be Permanent and Prevent Recurrence of the Pest Problem	44
5.1.5 Easiest to Carry out Safely and Effectively	44
5.1.6 Most Cost-Effective in the Short and Long Term	44
5.1.7 Appropriate to the Weather, Soils, Water, and the Energy Resources of the Site and the Maintenance System	45
5.2 Timing Treatments	45
5.2.1 Spot Treatments	45
5.3 Summary of Available Treatment Options	45
5.3.1 Education	46
5.3.2 Habitat Modification	46
5.3.3 Modification of Horticultural Activities	46
5.3.4 Physical Controls	47
5.3.5 Biological Controls	48

5.3.6 Microbial Controls	49
5.3.7 Least-Hazardous Chemical Controls	49
5.4 How to Select a Pesticide for an IPM Program	51
5.4.1 Safety	51
5.4.2 Species Specificity	53
5.4.3 Effectiveness	53
5.4.4 Endurance	53
5.4.5 Speed	53
5.4.6 Cost	53
5.5 Pesticide Use, Disposal, and Storage	53
6. Bibliography for Part 1	55
7. Glossary	57

APPENDICES

A. Sample Forms for Fulfilling the Requirements of the Healthy Schools Act	65
B. Pesticides Exempt from the Healthy Schools Act Right-to-Know Requirements	81
C. California Youth Authority Guidelines	93
D. Text of the Healthy Schools Act of 2000 (Chapter 718, Statutes of 2000)	97
E. School District IPM Policies: Model Policy and Examples	107
F. IPM-Related Curricula and Resources for the Classroom	127
G. Pesticide Information Resources	131
H. Recommended Reading	135
I. Sample IPM Contracts	139
J. Establishing Integrated Pest Management Policies and Programs: A Guide for Public Agencies	157
K. How to Collect and Preserve Specimens for Identification	173
L. Pest Management Assessment Tool	177
M. Monitoring Forms	195
N. Inspection Checklist for Detecting Structural Decay and Structural Pest Damage	211
O. Training and Licensing Opportunities	219
P. Pesticide Safety Information Series N	223

PART 2: PEST MANAGEMENT	251
INDOOR PEST MANAGEMENT	253
Ants	255
Carpenter Ants	259
Carpenter Bees	261
Carpet Beetles.....	263
Clothes Moths	267
Cockroaches	271
Fleas	277
Flies	281
Head Lice	285
Head Lice Information Packet for Schools	289
House Mouse	297
Pantry Pests.....	301
Rats in Schools	305
Scorpions in Schools	321
Silverfish and Firebrats	327
Spiders	329
Termites	333
Termites (Drywood)	339
Wood-Boring Beetles	345
OUTDOOR PEST MANAGEMENT	349
Annual Bluegrass	351
Bermudagrass	355
Cliff Swallows	359
Clovers	363
Common Knotweed	367
Common Purslane	369
Crabgrass	373
Dallisgrass	377

LIST OF BOXES FOR PART 1

Box 1-1: What is a Pesticide?	3
Box 1-2: Principles of IPM.....	4
Box 1-3: Where to find a copy of the Healthy Schools Act	8
Box 2-1: Components of an IPM Program	9
Box 2-2: Identifying Pest Management Roles	10
Box 2-3: Tips for Starting an IPM Program.....	11
Box 4-1: Is a Response to an Existing Pest Population Needed?.....	38
Box 5-1: Definitions of Signal Words for Pesticides	52

LIST OF FIGURES FOR PART 1

Figure 2-1: Flowchart of the IPM Decision-Making Process	20
Figure 3-1: Fluctuating Cockroach Trap Counts	36
Figure 4-1: Injury and Action Levels	42
Figure 4-2: Effect of “Revenge” Treatments	42

LIST OF TABLES FOR PART 1

Table 3-1: Plant Condition Rating	34
Table 3-2: Pest and Plant Damage Abundance Rating	34
Table 3-3: Tools Used in Monitoring	35
Table 4-1: Examples of Action Levels for Schools	41
